BASIC-ABSTRACT:

External prepn. comprises base agent comprising vinyl acetate-croton copolymer and aliphatic alcohols, and active component. The copolymer is contained in an amt. of 0.5-30 wt.%.

USE/ADVANTAGE - The external prepn. is used as capsule for reconstructing liniment for skin. The prepn. prevents sticky feeling on skin, but is not washed away with sweat.

In an example 5 pts.wt. vinyl acetate-croton copolymer (RESYM28-1310 supplied by Kanebo-NSC KK) was dissolved in 50 pts.wt. ethanol, 0.75 pts.wt. indomethacin was added and dissolved. Then 44.25 pts.wt. purified distilled water was added to prepare an external prepn. having antiinflammatory and analgesic actions. 10 pts.wt. vinyl acetate-croton copolymer (RESYM28-1310) was dissolved in 50 pts.wt. ethanol. The 7 pts.wt. of diethyl toluamide was added and dissolved. Then 33 pts.wt. of purified distilled water was added to prepare an insect repellent external prepn. 5 pts.wt. vinyl acetate-croton copolymer (RESYM28-1310) was dissolved in 60 pts.wt. isopropanol. Then 0.26 pts.wt. of 2-amino-2-methyl-1-

propanol was added and dissolved. Then 0.01 pts.wt. benzethonium chloride and 34.73 pts.wt. purified distilled water was added to prepare the antiseptic external prepn.
